ABOUT US

INTRODUCING REJS

At REJS, we believe that **organization is the key to success**, and we're dedicated to providing high-quality products that help you stay on top of your game.

Our cutting-edge manufacturing process ensures that every REJS product is built to last, with **durable materials** and expert craftsmanship. From sleek and stylish drawer organizers to versatile storage cabinets and shelves, our products are designed to help you keep your home or workspace clutter-free and running smoothly.

We understand that everyone's storage needs are unique, which is why we offer a wide range of customizable solutions to fit any space or situation. Whether you're looking for a simple way to organize your kitchen, a comprehensive storage system for your office, or something in between, we've got you covered.

At REJS, we're not just about making great products. We're also committed to providing exceptional customer **service and support every step of the way**. From the moment you place your order to the day your REJS product arrives at your doorstep, we're here to ensure that you're completely satisfied with your purchase.

So why wait? Experience the REJS difference today and discover a whole new level of organization and efficiency.

SHARED VALUES? FOR GENERATIONS!

We are a family-owned company. Our mission is to create high-quality products and solutions that provide user comfort and ergonomics.

The REJS team is largely made up of long-time employees, often in the second generation, with third generation employees appearing.

We have a staff turnover rate of less than 2%, which is absolutely below average market data.

of furniture accessories

MANY YEARS OF EXPERIENCE

Established
in 1993

WELCOME TO THE REJS MACHINERY PARK...

...where **innovation meets precision**. Our state-of-the-art equipment and expert team of engineers and technicians make us a leading provider of high-quality manufacturing services.

With 30 years of experience in the industry, we pride ourselves on our ability to deliver top-notch solutions that meet even the most demanding specifications. From CNC machines to laser cutters, our machinery park is equipped with the latest technology to ensure that every project we undertake is completed with accuracy and efficiency.

At REJS, we're dedicated to providing our clients with unparalleled **service and support**. We work closely with each customer to understand their unique needs and requirements, and we're committed to delivering results that exceed expectations. Our **team of skilled professionals** is always on hand to provide guidance and advice, from design and prototyping to production and assembly.

From small-scale projects to large-scale production runs, we have the capability and expertise to handle any job. Our machinery park is equipped to handle a wide range of materials and processes, including metalworking, plastic molding, and much more.

REJS AS A MANUFACTURER

REJS Group is a Poland's leading **manufacturer** of furniture accessories and components and a professional **supplier of services** and products for the furniture, logistics and other industries.

More than 1,000 qualified employees in production, sales, transportation, construction and service companies.

MODERN MACHINERY PARK

We have advanced manufacturing facilities including machines for laser cutting and machining of sheets and profiles, CNC machining, plastic processing of sheets and wires, heat fusion, and welding. The company's own machinery allows it to carry out production at the highest possible level independently. This is possible with the participation of the technology department and the company's own mechanical engineering and maintenance department formed by specialists with many years of experience, who verify the course of production processes and constantly improve them.

HOW WE WORK?

RESEARCH AND DEVELOPMENT

Since 2020, we have been implementing major R&D projects financed by EU funds.

- We transfer knowledge from scientific centers and we develop technological processes, optimizing the supply and selection of raw materials and management processes.
- We are conducting research work on the production technology of a modular furniture slide, a wardrobe system based on a magnetic field, and new applications of a furniture board with a heating system, which has been granted a patent by the Polish Patent Office.

LABORATORY & TESTING LAB

We have a state-of-the-art laboratory where we measure the strength, hardness and chemical composition of the steel we use for production. Thanks to measuring probe and a laser scanner, we can make precise measurements of the products we produce.

We verify the functionality, strength and durability of the product during tests conducted by Quality Control.

We conduct validations based on accepted standards. Depending on the need, we refer to standards commonly available in PCS (PKN) or based on standards received from our customer.

KITCHEN

One kitchen, multiple possibilities

The kitchen is the place where the heart of every home beats. Leisurely breakfasts, family lunches, romantic dinners. A meeting place for all household members. In order to fully enjoy its comfort, it is worth thinking about the appropriate - both ergonomic and functional use of space at the beginning of the design process.

The Variant MULTI line offers a multitude of solutions designed for under-counter cabinets and even more configuration options. The users themselves choose the variant of wire baskets and the type of sliding system that will guarantee smooth and comfortable movement during thousands of opening and closing cycles.

The **Maxima** line is systems designed for the demanding user. It includes 4 styles of baskets: PURO, Silva, Evo and Classic. Baskets from the **Classic** systems are made of wire. Those in the **Silva** and **Evo** lines have solid bottoms - made of laminated furniture board or plastic, respectively. And **PURO** accessories are made of high-quality steel and are available in 2 colours: black with wood décor or white with glass.

There are 4 noteworthy novelties. **Corner Space** and **Corner Space Plus** are systems for corner cabinets that provide even more comfortable use of these capacious, but generally hard-to-reach furniture. **Maxi Space** and **Maxi Space Duo**, on the other hand, are solutions for tall cabinets. These spacious cargoes offer a high load capacity of up to 70 or even 75 kg. Maxi Space Duo can be installed like a side-by-side opening system (two products are required) as it includes baskets suspended from the fronts in addition to the basic racks hidden in the body. With two styles of baskets to choose from and the universal design of these systems, they are easy to incorporate into built-in cabinets. It is the perfect solution for organizing a handy but very packable pantry.

WASTE SEGREGATION

Waste segregation has never been so easy

Segregating waste at home can be comfortable if you match a set of garbage cans to your habits and guarantee hassle-free access to all garbage cans at once. That is why the REJS range of waste segregation systems includes several different solutions in many variants, so everyone can find the perfect set for themselves.

Segregation sets can be divided according to the method of installation.

Inserted into a drawer: PRAKTIKO

PRAKTIKO systems include buckets made of durable plastic set on a collective tray. They fit 60, 80 and 90 cm wide drawers, allowing you to adjust them to the space you have. Choose from sets with different numbers and capacities of buckets: from 3 to 4 large baskets, plus 2 or 4 smaller garbage cans.

SEGREGO is a functional and convenient drawer system with storage bins that can be fully extended from the cabinet. SEGREGO sets include from 2 to 4 bins of different capacities. They are covered by a collective lid that can function as a separate shelf. They are designed for cabinets of 45, 50, 60 and 80 cm in width.

The **JC** line are bins racks integrated with the slide system, designed for cabinets with hinged fronts, but also for those with pull-out fronts - after purchasing a special assembly kit. Available in 2 heights, the baskets (33 and 44 cm) have a capacity from 7 to even 20 liters. They are covered by a single common lid. JCs are designed for 30, 40, 45 and 60 cm wide cabinets.

The majority of REJS segregation systems can be equipped with available electric assisted opening systems. The Hailo Libero 3.0, developed by German specialists, can be fitted to any drawer. To open it, all you have to do is move your foot around the sensor located in the bottom rim. In turn, with the Servo-Drive Uno by Blum, the drawer is opened by pressing the front with your hand or knee.

*To open the drawer simply place
your foot in the area
of the front sensor.*

The **Hailo Livero 3.0** is the latest electric, drawer opening system developed by German Specialists. It does not require a special cabinet, it can be mounted to the bottom of any drawer. Thanks to this system a heavily loaded drawer can be easily opened by moving the foot near the sensor located in the bottom panel. The device can be connected via wi-fi using a phone or computer. The system has an integrated light, the intensity of which, as well as the speed of the drawer extension, and sensitivity of the sensor, can be adjusted to the needs of the user.

*To open the drawer simply
press your hand or knee
against its front.*

Waste segregation

Thanks to the **Servo-Drive Uno** from Blum, opening and closing drawers can be accomplished by simply applying pressure to the drawer front using a hand or knee. Using this system helps to keep drawer fronts clean, and at the same time the user benefits from the systems soft closing mechanism.

In order to mount the Servo-Drive Uno, a separate frame is needed. This can be purchased separately.

Hailo Libero 3.0

1 Drive Unit Hailo Libero 3.0

- designed for waste systems Segrego, Sorte, Praktiko
- adjustable drive force, sensor sensitivity, and lighting intensity

DRAWER SYSTEMS

and runners

Everything in its place

Drawers are one of the most versatile and convenient solutions. They work well in the kitchen and pantry, but also: bathrooms, living rooms, offices and children's rooms. Available in two variants: inside and front, as well as many sizes - they make it easy to store and organize things large and small.

Unlike traditional shelves, drawer systems allow full use of space and easier access to stored items. The use of internal organization systems - dividers, rails and inserts (metal, plastic and wooden) makes it easier to keep things in order even among small items, while the use of top-quality slides with quiet soft-close and guarantees smooth movement and discreet closing. Even waste segregation systems can be set up in the top drawers.

REJS offers several drawer systems that differ in both appearance and functions.

The bestselling **Comfort Box** and **Slim Box** and the latest **Ultra Box** come in both interior and front versions. They are available in several colours: white, graphite, silver and black.

Maxima PURO drawers are very popular. Made of the highest quality stainless steel, they are available in two colour versions to choose from: black with wood decor and white with glass. In addition to the front drawers, noteworthy is the new drawer with automatic extension under the hinge, as well as internal models, which come in 2 heights: 5 and 8 cm, and 3 widths: 60, 80 and 90 cm. The lower ones come without a decor front, making them suitable for storing, for example, small household appliances.

The latest offering is the **Ultra Box** drawers, which are distinguished by their slim lines, while being extremely sturdy and absolutely practical. UltraBox drawers are easy to assemble and adjust, and the soft drawer pull provides comfort. They are offered in 4 heights: 86, 118, 167 and 199 mm and 6 slide lengths of 30, 35, 40, 45, 50 and 55 cm. They are available in two colours: elegant white and practical graphite.

INTERNAL ORGANISATION SYSTEMS FOR DRAWERS

Wooden inserts

- for drawers 500 mm deep
- compatible with Ultra Box / Slim Box front and Blum Legrabox
- can be used with other drawer systems, e.g. Comfort Box (perfect fit not guaranteed)
- 5 types of inserts designed to store specific products
- sold individually enabling tailored layout
- if the chosen layout necessitates space between inserts we recommend using our anti-slip mat (p.130)

Basic Components

1 Insert for knives and forks

width	index	colour
260	TO01.1008.48	227

2 Insert for spices

width	index	colour
260	TO01.1108.48	227

3 Insert for kitchen knives

width	index	colour
200	TO01.1209.48	227

Metal frames

- for Ultra Box / Slim Box drawers with depths 450, 500 and 550 mm
- available in 3 widths and 3 lengths
- sold individually enabling tailored configuration
- one divider included, possible to add more dividers
- can accommodate our metal containers (p. 128)
- we recommend using a non-slip mat (p. 130)

THE DRESSING ROOM

Tailor-made solutions

Creating the closet of your dreams has never been so easy. Practical drawers for underwear, pull-out shelves for shoes, hanger systems for dresses, jackets or pants - will keep the perfect order and please the eyes. REJS's solutions allow you to customize your closet and tailor it perfectly to your needs.

Awarded the Diamond of Furniture Industry 2022, **Maxima PURO** accessories have been designed with exceptional attention to detail and finish, making them a true ornament of wardrobe rooms. All systems are available in two variants: white with an insert of transparent glass or black with wood decor in a warm caramel hue. For all, an anti-slip mat is included as standard. Maxima PURO includes also: shoe extensions, as well as internal drawers 5 and 8 cm high and 60, 80 and 90 cm wide, which can accommodate both small items and larger things.

Complementing the drawers are **wardrobe inserts** of various shapes and widths of 10, 20 and 52 cm, which can be arranged in various configurations. They are ideal for storing and displaying jewelry or accessories. They are available in two variants. Those upholstered in white eco leather are lined with soft black velvet, while those upholstered in black eco leather are lined with copper velvet.

Variant MULTI closet accessories are lightweight, air-circulating openwork frames and baskets, as well as a dedicated universal REJS running system with a maximum load of 35 kg. The line includes packable pull-out baskets for textiles, as well as shoe drawers and drawers with trouser hangers. The systems are available in 60-, 70-, 80- and 90-cm widths, making it easy to fit them into built-ins. All of them are offered in two colour options: white and black in a fashionable matte finish.

Complementing the offer for the REJS closet are **Simpla** openwork baskets, pantographs lowered on pneumatic lifts and pull-out hangers of various types.

BATHROOM

laundry | utility room

Functionality and simplicity

The bathrooms and utility room space must be both functional and friendly. With the help of REJS brand accessories, we can easily organize cabinets and drawers, and at the same time make optimal use of space.

In the bathroom

Lower Cargo Mini is perfect for bathrooms. We can easily organise: detergents, cosmetics, towels, as well as small appliances, such as a hair dryer. Lower Cargo is designed for low cabinets with a depth of 30 cm and: 15 to 40 cm wide (bottom running system with front fixing) or 30 to 40 cm wide (bottom running system under the hinge). So it can be used even in narrow, difficult to manage spaces. Full extension will guarantee access to all things at once.

REJS offer also includes laundry baskets. Available in wire and plastic version can be attached to the tilting front of the cabinet, or - pull out. Designed for cabinets 60 cm wide, the innovative REJS drawer with two laundry baskets has been awarded the 2023 Furniture Diamond.

In utility rooms

REJS accessories designed with utility rooms in mind include vacuum cleaner pipe hangers in various sizes, hangers and hooks, as well as an all-in-one solution such as the House Master rack.

Awarded the 2022 Furniture Diamond, the House Master rack works well in the utility closet, pantry, laundry room, as well as in the garage. It is designed to accommodate all the accessories needed for cleaning. Available in right and left versions, it is designed for min. 40 cm wide cabinets. The basic version includes 3 baskets lined with a non-slip mat, a bar for 3 hooks, a hanger for the vacuum cleaner pipe and 3 handle holders.

OFFICE

Modern work space

How to create a work space that will promote focus and creative ideas, while allowing you to take care of your health? REJS brand furniture accessories are reliable in this task.

Whether you are talking about furnishing a classic office, a conference room, a laboratory, a home office corner or a child's room, the basis must be a suitable, customized desk. The Futuro electric desk frame proposed by REJS allows you to smoothly adjust the height of the top in the range of 625-1275 mm, thus adapting it to the specifics of the working person and his style of work (sitting or standing). You can lower or raise the tabletop using an easy-to-use control panel. You can also enter 4 favorite positions into the system. The safety of the adjustment is ensured by a special mechanism that will stop the movement when the sensor notices an obstacle.

FUTURO is available in three colours: white, black and silver. Thanks to its width, which is adjustable in the range of 1075-1800 mm, it is possible to attach a table top with a maximum size of 100x200 cm. The Futuro frame was awarded the Diamond of Furniture Industry 2022.

Complementing the offer for REJS offices are additional accessories, such as: a stand for the computer central unit, locks and furniture casters. Noteworthy are connectors matching Futuro that allow you to connect desks and separate workstations, as well as grommets and troughs to prevent cables from tangling.

FUTURO Desk frame with electrical height adjustment

FUTURO

Product characteristics

- universal usage
- height adjustment 625-1275 mm
- frame width adjustment 1075-1800 mm
- maximum load capacity 80 kg
- height memory for up to four users
- anti-collision sensor
- built-in USB socket
- 2 motors guarantees a smooth movement
- legs are made of 3 columns
- power 110-230V
- maximum speed: 40 mm/s
- tested to 60 000 cycles

Durability and peace of mind for years

Furniture hardware: hinges and lifters, are elements that one usually does not pay much attention to. And yet they are responsible for the comfort of furniture. It depends on their durability and quality whether the opening of the front will remain unnoticed or cause irritation.

The offer of REJS brand hinges includes solutions that allow you to create cabinets of almost any type. We offer the following hinges: overlay hinges, twin hinges, recessed hinges, angle hinges and parallel hinges, as well as hinges with a wide opening angle.

The offer includes **3 groups of solutions** for different tasks and projects. For those looking for durable but economical solutions, the **Basic** group is recommended. For more extensive projects, on the other hand, **Regular** hinges are recommended, which will perform well during standard operation.

Those who require above-average quality should consider hinges from the **Expert** line. They allow for easier installation - thanks to click-on technology, higher functionality and durability (tested according to PN-EN 15570:2010 for 80,000 cycles) and aesthetic qualities. In addition, they are equipped with a silent closing function, thanks to which the fronts close softly and discreetly.

Expert hinges with 35 cup. Aesthetic and functional hinges combined with the SOFT CLOSE function, ensuring gentle and quiet closing of cabinet doors. The eccentric adjustment allows you to set the cabinet door in the right position in one step.

Mounting of the hinge-arm to the guide.

CLICK-ON

Simple assembly and dissassembly without tools by pressing the hinge arm into the guide.

Hinge quantities

The number of hinges depends on the height and weight of the cabinet front. Stability ensures the greatest possible distance between the hinges. The data refers to cabinet fronts with a width of 600 mm.

High quality

- Tested according to standards PN-EN 15570:2010 to 80.000 Cycles

Aesthetic performance

- Signed with the REJS logo
- Cover plate for hinge-arm and hinge-cup included (except the wide-angle hinge)

Packing

- Packed ones or pairs in printed bags
- Set includes: hinge, guide, coverplates and screws

Regular hinge

Regular hinges with a cup Ø35. Aesthetic and functional hinges with SOFT CLOSE, ensuring gentle and silent closing of cabinet doors.

Mounting of the hinge-arm to the guide.

CLICK-ON

Simple assembly and dissassembly without tools by pressing the hinge arm into the guide.

Hinge quantities

Packaging: Hinges packed in plastic bags, in 1 pc.

The number of hinges depends on the height and weight of the cabinet front. Stability ensures the greatest possible distance between the hinges. The data refers to cabinet fronts with a width of 600 mm.

HANDLES AND FURNITURE KNOBS

hooks | aluminium frames

Finishing at the highest level

Beauty is in the details, which is why REJS' offer could not lack elements for finishing furniture. The brand's assortment includes a wide range of furniture handles, as well as aluminum profiles and the increasingly popular glass.

The range of REJS handles includes minimalist models, as well as artful and fine, subtly rounded or strictly geometric ones. Some delight with innovative form, others with classic, timeless lines. Among them you can find edge and recessed handles, as well as railing, screw-on and knob handles. And on top of that, almost every one comes in several sizes and colours.

Also noteworthy are aluminum profiles with different surface finishes. They are used to create cabinet fronts - those opened classically and the tilting ones. They also work well as drawer fronts, especially those wide and high. As a filling of fronts made of aluminum profiles, REJS offers a wide range of single-colour, satin, three-dimensional glass, as well as with imprints of any graphics. The service of cutting formats for any purpose is also a considerable convenience.

Assembly template for handles and furniture knobs

Decorative elements

- Allows precise drilling of holes for handles and knobs on furniture fronts
- Adapted for spot-mounted handles
- and with hole spacing from 32 mm to 320 mm (pitch every 32 mm)
- Horizontal markers indicate hole pacing of the mounted handle
- vertical marks define the distance of the handle from the top edge of the front panel

LED LIGHTING

New forms of lighting

Modern lighting systems are not only functional, but also decorative. Luminaires, strips and tapes are meant not only to illuminate, but also to decorate furniture and interiors. And this is exactly what the systems offered by REJS do.

The basis of our lighting offer are profiles and energy-saving LED strips, which can be installed both in wall and ceiling cladding, as well as in built-ins and stand-alone furniture. Depending on your needs, the tapes can emit bright or cosily dimmed, warm, neutral and cold light. We offer them in 4 variants, in basic length of 5 m, and the 2835 variant - also 50 m, which allows you to create even bold and large light installations.

LED strips are complemented by accessories: connectors and easy-to-install power supplies. MASTER power supplies are available in 8 variants (7, 12, 16, 24, 33, 54, 65, 80W), the easy-to-hide MASTER SLIM in 4 (15, 24, 36 and 60W), and the socket power supply in a 6W version. All are powered from a standard 230V mains.

The offer closes with a range of functional switches for various applications allowing remote control and light intensity adjustment.

ADDITIONAL ACCESSORIES

Accessories matter

REJS also offers other furniture accessories, such as furniture feet, hangers for upper cabinets, racks, various types of brackets, clamps, hooks and shelf supports, as well as many other accessories necessary in everyday work.

Worth noting are ventilation grilles that allow you to aesthetically hide the heat source while using it efficiently, as well as a range of aluminum strips necessary for finishing kitchen countertops.

To further facilitate the process of creating furniture, and especially the transportation and assembly itself, in our range we also have protective products such as tapes, cardboard or protective films.
